E-COM 2 PADDED

E-COMMERCE SOLUTIONS

INNOVATIVE AND SUSTAINABLE SOLUTION FOR E-COMMERCE

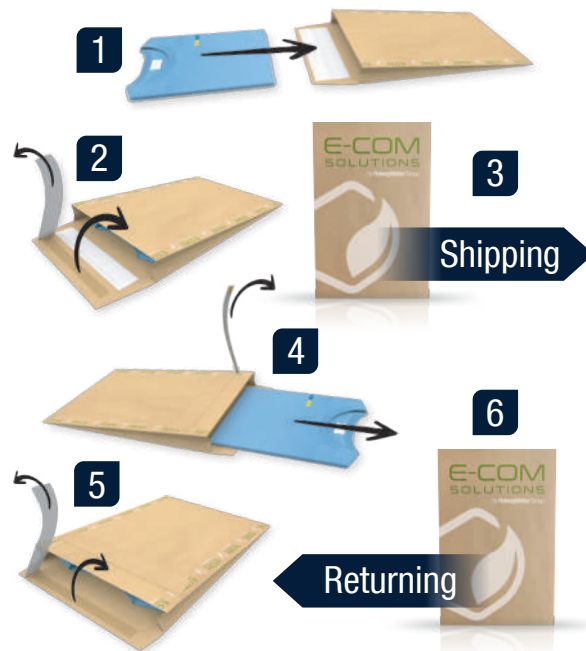

Like E-Com 1 solutions, packaging produced by the E-Com 2, is biodegradable and has a shipping and return feature, which allows for reliable use and reuse. It also offers padding possibilities and a refined product finish for large application possibilities.

FRUSTRATION-FREE E-COM PACKAGING

The "Ship & Return" mailer bag has a unique gusset feature that provides the flexibility one needs to send out a variety of goods purchased online. In addition to this unique feature, the mailer bag also has a two-seal system that makes sending and returning goods easy and reliable:

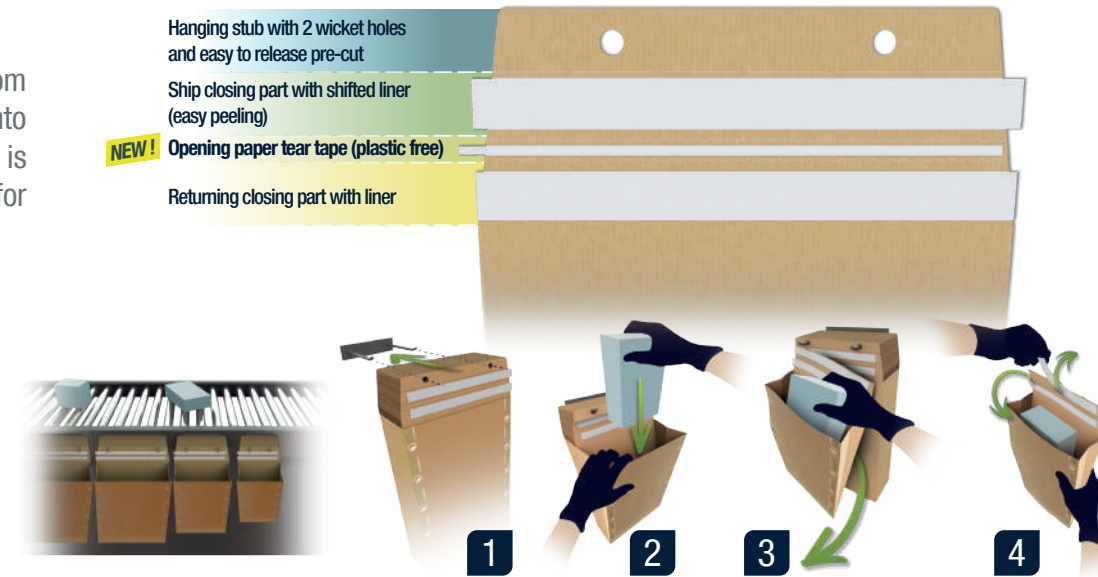

- 1- Put an item into the mailer bag
- 2- Close the bag with the first release strip
- 3- Send the bag out with the item inside
- 4- Remove the tap of the easy opening system
- 5- Put the item back close again with the second release strip
- 6- Return the bag with the item safely enclosed inside

FULLFILLMENT CENTER READY

In addition to end customer dedicated functions, our E-Com solutions have also been designed to be easily integrated into logistics chain. The multifunction flap of our packaging is Fulfillment Center Ready and allows simple and fluid filling for order preparation teams:

- 1- Put the bags on the hanging stub using the wicket holes
- 2- Put an item into the mailer bag
- 3- Easily release the bag from the hanging stubs
- 4- Close the bag with the first release strip

GREAT VERSATILITY FOR MANY PACKAGING SOLUTIONS

The E-Com2 lines offer various bags possibilities, dedicated to the E-commerce market, particularly the possibility of producing padded or non-padded paper envelopes. They are therefore a wide range of applications for your packaging solutions, with multiple options for shipping fragile objects, always offering optimal protection for the contents.

HIGH QUALITY E-COMMERCE PACKAGING

E-Com2 solutions make it possible to produce bags with or without gussets. The folded bottom allows both faces of the bag to be completely clear and smooth, or completely printed without any shaping, for high quality packaging.
